

INDEX 1979 Nos 80-83

Articles

- Acoustic simulation of the flight vibration environment D Sims **80.27**
- A brief evaluation of reliability growth monitoring techniques P D André **80.3**
- Environmental engineering today—a review of advances in military packaging R S Freeman **83.3**
- Environmentally assisted fatigue relating to power plant in the electricity supply industry J L Darlaston and T C Lindley **83.31**
- The factory inspectorate and the rubber industry E M Wickham **81.17**
- Gas turbine carcass and accessory vibration — problems of measurement and analysis D S Pearson, A H E Holme and P R Watts **83.15**
- The role of standards in reliability achievement H A Croasdale **83.25**
- Some experimental dynamic structure analysis techniques R G White and H G D Goyder **81.3**
- Some problems in monitoring airborne asbestos dust R Bent **82.19**
- The specification and assessment of reliability and durability for military equipment D L James **82.27**
- Spoilage of paint films by fungal growth S Barry and T Rubidge **81.14**
- The statistics of mechanical shock G E Johnson **80.21**
- A thick film humidity indicator N D Channon **82.23**
- A visit to Fawley power station A A Ember **83.41**
- Whys and wherefores of modal testing D J Ewins **82.3**

Authors

- André P D A brief evaluation of reliability growth monitoring techniques **80.3**
- Barry S (and T Rubidge) Spoilage of paint films by fungal growth **81.14**
- Bent R Some problems in monitoring airborne asbestos dust **82.19**
- Channon N D A thick film humidity indicator **82.23**
- Croasdale H A The role of standards in reliability achievement **83.25**
- Darlaston J L (and T C Lindley) Environmentally assisted fatigue relating to power plant in the electricity supply industry **83.31**
- Ember A A A visit to Fawley power station **83.41**
- Ewins D J Whys and wherefores of modal testing **82.3**
- Freeman R S Environmental engineering today — a review of advances in military packaging **83.3**
- Goyder H G D (and R G White) Some experimental dynamic structure analysis techniques **81.3**
- Holme A H E (and D S Pearson and P R Watts) Gas turbine carcass and accessory vibration — problems of measurement and analysis **83.15**
- James D L The specification and assessment of reliability and durability for military equipment **82.27**
- Johnson G E The statistics of mechanical shock **80.21**
- Lindley T C (and J L Darlaston) Environmentally assisted fatigue relating to power plant in the electricity supply industry **83.31**

- Pearson D S (and A H E Holme and P R Watts) Gas turbine carcass and accessory vibration — problems of measurement and analysis **83.15**
- Rubidge T (and S Barry) Spoilage of paint films by fungal growth **81.14**
- Sims D Acoustic simulation of the flight vibration environment **80.27**
- Watts P R (and D S Pearson and A H E Holme) Gas turbine carcass and accessory vibration — problems of measurement and analysis **83.15**
- White R G (and H G D Goyder) Some experimental dynamic structure analysis techniques **81.3**
- Wickham E M The factory inspectorate and the rubber industry **81.17**

Books

- Future energy concepts The Institute of Electrical Engineers **83.43**
- Physical Acoustics Volume XIII Feb 1979 Edited by Warren P Mason and R N Thurston **83.43**

Obituary

- J A C Cramer **82.15**

Features

- SEE 1979 Annual General Meeting **81.22**
- SEE Committee **82.32 83.44**
- SEE Programme 1980 **83.23**
- SEE Twenty Years On **80.19**
- SEECO 79 'Environmental Engineering Today' **80.11 81.9**
